

How to Set an Online Memorial's GPS Location Using the Map Function

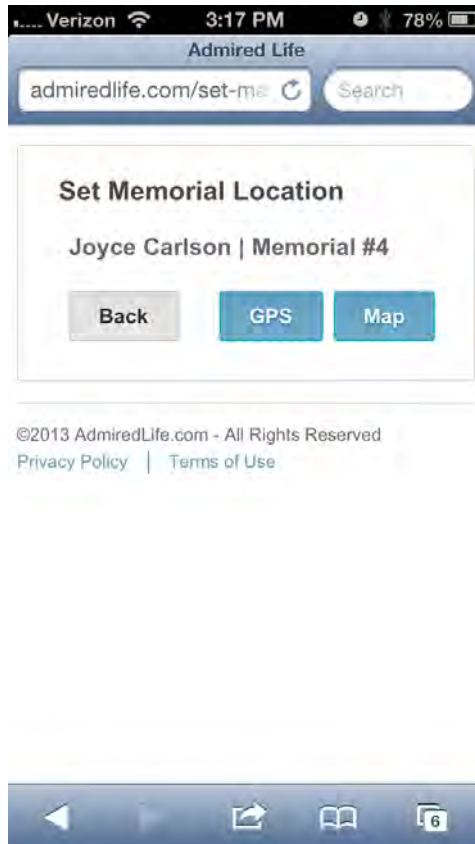

Step 1. Navigate on your smart phone's web browser to: www.admiredlife.com/setgps Your screen should look like this:

A screenshot of a mobile web browser displaying the AdmiredLife website. The browser's address bar shows "admiredlife.com/set-ma" and a search button. The page title is "Admired Life". The main content area is titled "Set Memorial Location" and contains two input fields: "Sales or Web Order Number*" and "Last Name of Deceased*", both with asterisks indicating they are required. A blue "Search" button is positioned below the second field. At the bottom of the page, there is a copyright notice: "@2013 AdmiredLife.com - All Rights Reserved" and links for "Privacy Policy" and "Terms of Use". The browser's status bar at the top shows "Verizon", "3:16 PM", and "78%" battery. The bottom of the screen shows a mobile navigation bar with back, forward, and search icons.

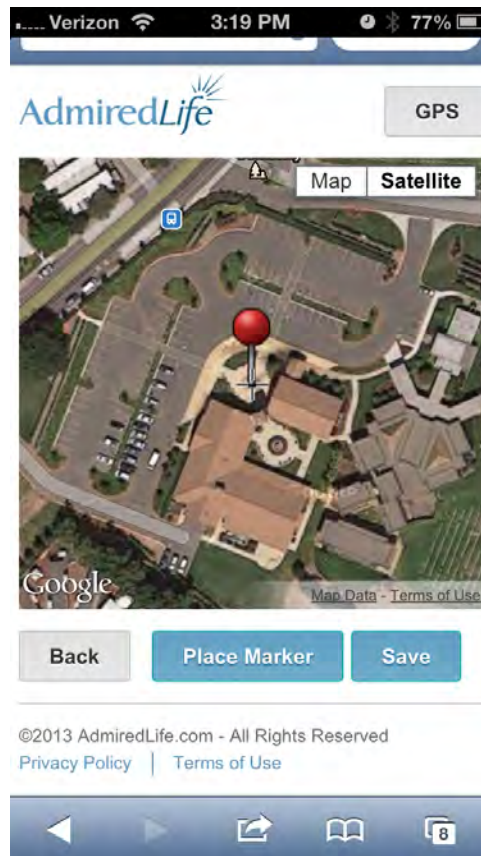

Step 2. On the **Redemption Certificate** or **Redemption Certificate E-Mail**, you will find the **Web Order Number** or the **Sales Order Number** and the **Last Name** of the memorialized person near the bottom.

Enter that number and the deceased last name and tap "**Search**"

Step 3. Now that you've found the memorial in our system, tap **"Map"** to select the option of setting a memorial by using satellite maps. See below:

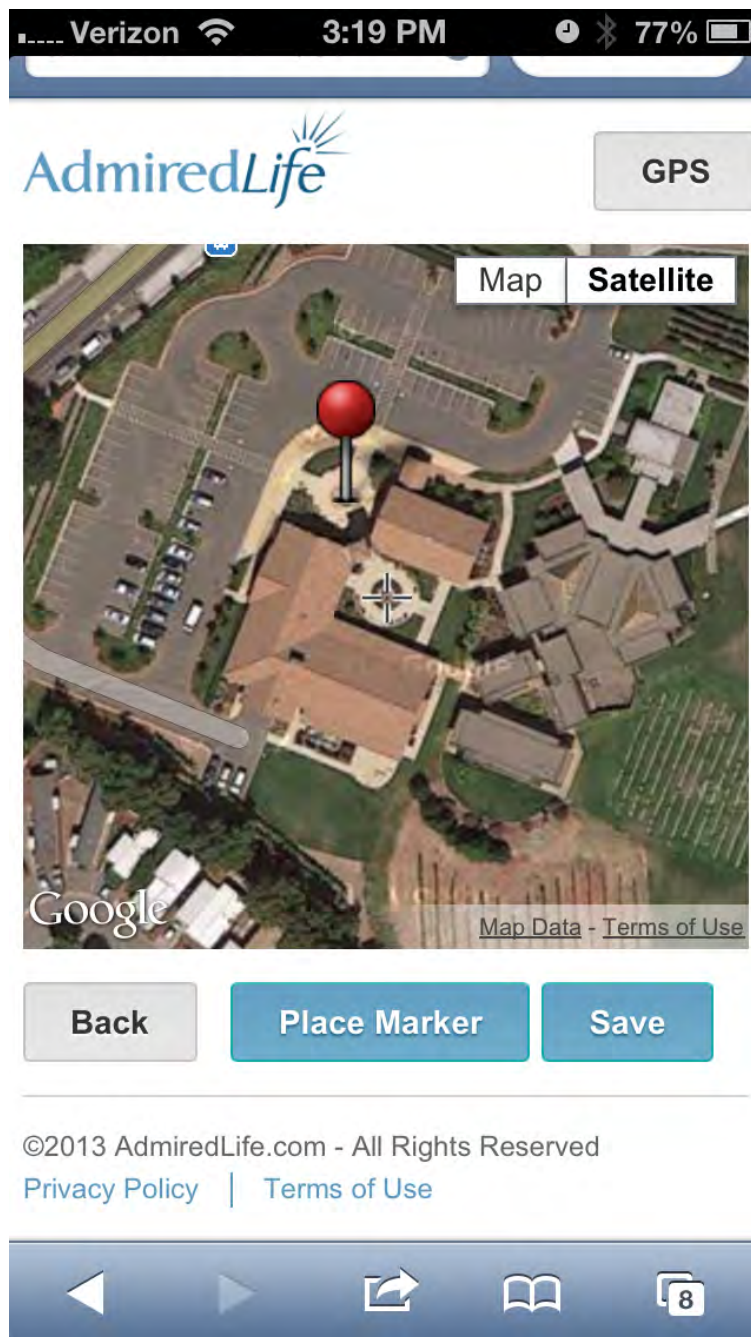

Step. 4 You are now at this screen while standing at the memorial site. Notice the cross hairs in the center of the screen, in this case, it's where the pin is located. This is where the memorial is set in the system. If the memorial has never been set, the cross hairs alone will show on the screen.

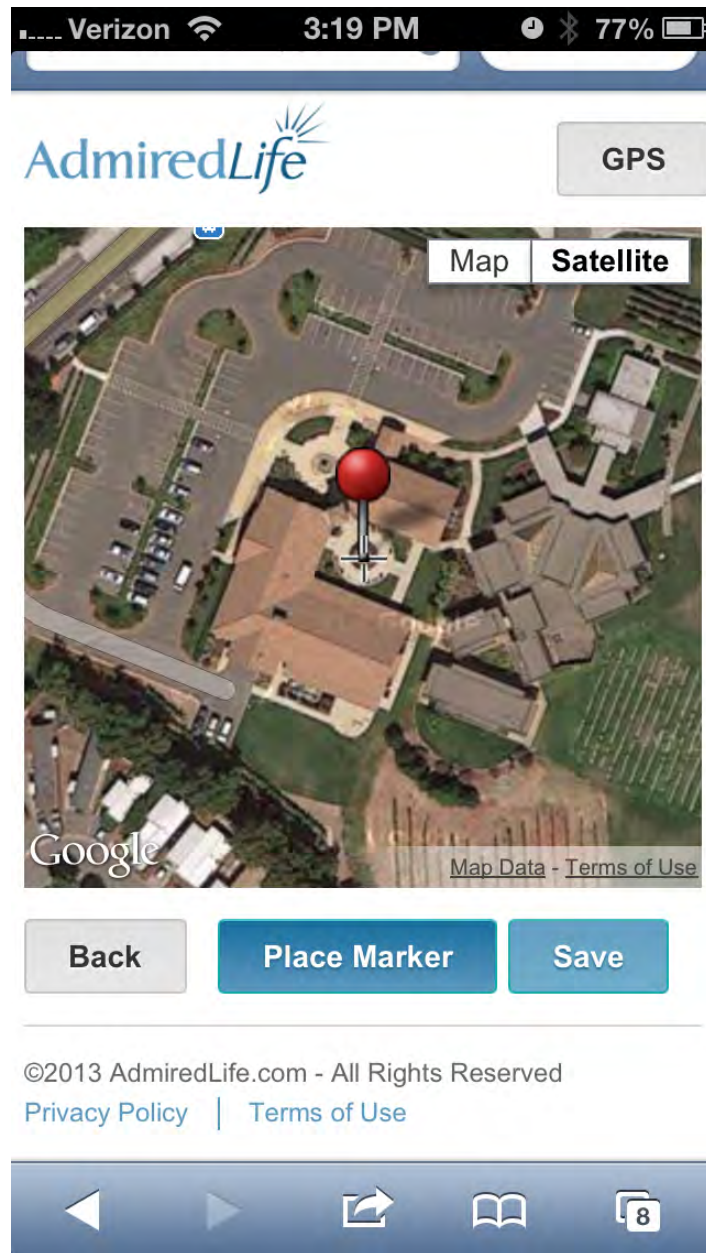

Note: Like most things on your smart phone, you can pinch and spread to zoom out and zoom in, respectively, on the map. If you want to be a little closer just spread your fingers on the screen.

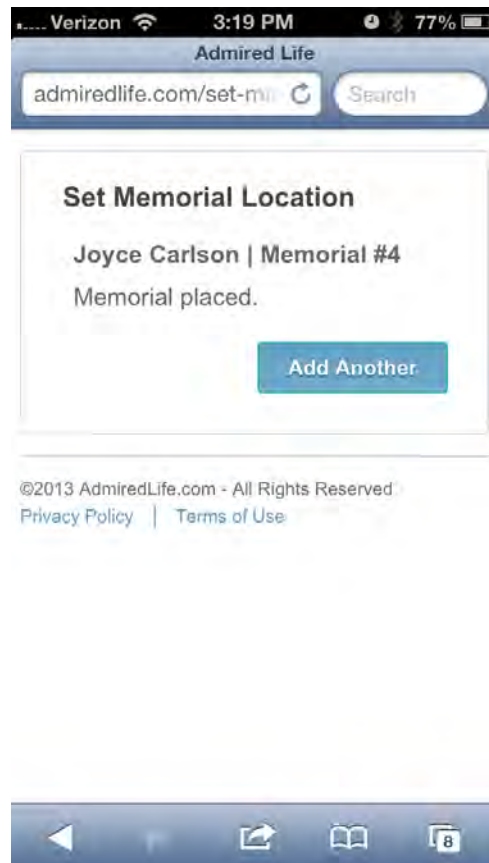

Step. 5 In this example we'll assume that the memorial would be better located at the fountain in the middle of the courtyard. So, with your finger, move the map so the cross hairs are directly on the fountain. See the example below:

Step 6. Then as you may have guessed it, you tap the **"Place Marker"** button to move the pin.

Step 7. And the final step is to tap the **"Save"** button. Your confirmation will look like this:

You're all done and have visually set the GPS location of the memorial in the system.

Note 1: We encourage you to experiment with the **Map** and **GPS** routines. You may find you like one over the other. Always know that your goal is to get close. Our unique technology will find the memorial data in the system when searching from the handset while in the cemetery. Plus, it will tell you approximately how many meters you are away from the site.

Note 2: Here is another great feature of the system when using the **Map** function to fine tune a setting made in the cemetery. When back in the office on your desktop computer, go to: www.admiredlife.com/setgps while connected to the internet. Locate the memorial using the data required and choose **Maps** again.

The screenshot shows a web browser window with the URL admiredlife.com/set-marker/step-4-map. The page header includes the AdmiredLife logo, a "Sign In" link, and a search bar for memorial names. Navigation links for "About this Site", "Claim a Memorial", "FAQs / Support", and "Contact Us" are present. The main content area displays "Joyce Carlson | Memorial" and "#4". Below this is a search input field with "Location Name or Coordinates" and "Search" and "GPS" buttons. A Google Maps satellite view is shown, with a red location pin placed on a building. The map includes street names like "Church Ln" and "Willow Rd", and a label for "CFCS St. Joseph Cemetery". At the bottom of the map are "Back", "Place Marker", and "Save" buttons. The footer contains copyright information for 2013 AdmiredLife.com and navigation links for "Home", "About", "Claim A Memorial", "FAQs/Support", and "Contact".

You'll see on your monitor right where the memorial is located and can adjust it further if you wish.

set_memorial_smartphone_maps_v1

Here in the center of the screen the map shows the cross hairs being positioned on the first memorial in that row.

The screenshot shows a web browser window with the URL `admiredlife.com/set-marker/step-4-map`. The page header includes the AdmiredLife logo, a "Sign In" link, and a search bar with the placeholder text "Search for memorial by name". Navigation links for "About this Site", "Claim a Memorial", "FAQs / Support", and "Contact Us" are present. The main content area displays "Joyce Carlson | Memorial" and "#4". Below this is a search bar with the placeholder "Location Name or Coordinates" and buttons for "Search" and "GPS". The central feature is a Google Maps satellite view of a cemetery. A white crosshair is positioned over a row of headstones. A "Map" button is in the top right corner of the map area. Below the map are buttons for "Back", "Place Marker", and "Save". The footer contains copyright information: "©2013 AdmiredLife.com - All Rights Reserved" and links for "Privacy Policy" and "Terms of Use". Additional navigation links include "Home", "About", "Claim A Memorial", "FAQs/Support", and "Contact".

You could place the Pin Marker here and relocate the memorial from your desktop by tapping the "Place Marker".

Pin placed, click “Save” and you’re done!

The screenshot shows a web browser window with the URL `admiredlife.com/set-marker/step-4-map`. The page header includes the AdmiredLife logo, a 'Sign In' link, and a search bar. Navigation links for 'About this Site', 'Claim a Memorial', 'FAQs / Support', and 'Contact Us' are present. The main content area displays 'Joyce Carlson | Memorial #4' and a search bar with 'Location Name or Coordinates', 'Search', and 'GPS' options. A Google Map is shown with a red pin on a cemetery. Below the map are 'Back', 'Place Marker', and 'Save' buttons. The footer contains copyright text and site navigation links.
